Sample CSI Coordination Guide

Planning language for organizing athletic equipment categories during specification review.

Specification index

11 66 23	Gymnasium Equipment - backstops, divider curtains, volleyball systems, controls, padding
11 66 53	Gymnasium and Exercise Equipment - racks, platforms, storage, room planning
11 68 33	Athletic Field Equipment - soccer goals, benches, shelters, barrier netting

Example Part 1 - General

Coordinate athletic equipment with structure, electrical work, life-safety systems, finishes, and adjacent equipment. Submit product data, project-specific drawings, finish selections, and operating requirements for review.

Example Part 2 - Products

Provide project-configured equipment with materials, dimensions, finishes, operating systems, and accessories indicated in approved submittals. Model references are preliminary and require confirmation by the project team.

Example Part 3 - Execution

- + Verify field conditions before fabrication
- + Coordinate delivery and installation sequencing
- + Install through qualified personnel
- + Demonstrate operation to the owner
- + Provide project-specific closeout manuals and maintenance schedules
